Subject: Conference Call RE: Kalamazoo SWAC and Fish Trends

Garry,

I wanted to follow up on our conference call yesterday. We are able to have a conference call today at 4 pm eastern regarding SWACs and fish trends. Paul has indicated that John Kern is available today. John Canar is not, however I spoke to him and I want to have a call today to make some progress on this issue. Given the fact that the "Johns" have discussed this topic and are on the same page, it makes sense to have the call from the EPA/MDEQ side.

If this works for your team, please set up a conference call/number and distribute the information. We should also plan on having a follow-up call on 4/17 to continue the discussion.

Thanks
Jim
